

### Copper NiTi

OrthoEssentials has added a new product to its line of Royal Premium archwires. The new addition, Copper NiTi, is available in two forces, with or without a stop. The wire offers greater resiliency, narrowed hysteresis and better control of transformation temperature and forces.

For more information, call 866-517-3257 or 215-396-3803, or email [info@orthoessentials.net](mailto:info@orthoessentials.net).

### Apex TMA

QC Orthodontics Lab has recently released a new product—the Apex TMA spring retainer. This retainer's design addresses the issue of acrylic wear in the critical areas that traditional spring retainers encounter due to insertion and removal.

Fabricated with beta titanium, the Apex TMA flat wire allows for approximately 60 percent more contact on the facial and lingual tooth surface, resulting in a greater rotational force. Spring and labial bows kits are available in various sizes for manufacturing.

For more information, call 800-537-1018 or email [info@qcortho.com](mailto:info@qcortho.com).

# New Products

If you would like to submit a new product for consideration to appear in this section, please send your press release to [arselia@farranmedia.com](mailto:arselia@farranmedia.com).

### Edge Specialist

Edge Specialist, a new module available with Ortho2's Edge practice management system, allows you to include patients in both orthodontic and pediatric dentistry treatment simultaneously. The software also provides two tooth charts to record both orthodontic and dental procedures.

The module allows you to easily bill multiple codes per appointment, and view the ledger by specialty. With Edge Specialist, you won't have to worry about having multiple programs for your expanding office.

For more information, contact your regional manager at [sales@ortho2.com](mailto:sales@ortho2.com) or call 800-678-4644.
