

## ORTHODONTICS

### ARCHWIRES

#### American Orthodontics

American Orthodontics' wire portfolio offers several options to fulfill treatment goals. Tanzo Premium Heat Activated, Iconix aesthetic wire and NT3 Superelastic all provide excellent quality. Tanzo delivers consistent unloading forces that allow controlled tooth movement for predictable results. Available in mid- and low-force levels, Tanzo is resilient with excellent resistance to permanent deformation.

### BANDS AND ATTACHMENTS

#### American Orthodontics

American Orthodontics' award-winning products, such as MR1 Bands, buttons, buccal tubes, closed- and open-coil springs and memory chain, combine the quality and performance that orthodontists have relied upon for decades. American Orthodontics is focused on the orthodontic specialty with relentless innovation and continuous improvement.

### BONDING: ADHESIVES

#### 3M Oral Care: APC Flash-Free Adhesive

The 3M APC Flash-Free Adhesive Coated Appliance System offers innovative design with next-generation, resin-soaked nonwoven mats that adhere to the enamel for a reliable bond that also eliminates the process of flash removal. It requires fewer bonding steps than traditional light-cure adhesive systems, which saves time. It is available on an array of 3M products to treat aesthetically without compromise.

### BONDING: SELF-ETCHING PRIMER

#### 3M Oral Care: 3M Transbond Plus Self-Etching Primer

3M Transbond Plus Self-Etching Primer lets orthodontists etch and prime enamel in one step. A single-patient-use foil pack contains premeasured etchant and light-cure primer that are applied together using a disposable applicator included with each pack. Works in both moist and dry environments with outstanding bond strength when used with moisture-tolerant adhesives.

**BONDING: TRADITIONAL PRIMER**

### Reliance Orthodontic Products: Assure Plus All Surface Bonding Resin

Assure Plus is the newest technology in artificial surface preparation. Assure Plus allows clinicians to successfully bond to gold, amalgam, stainless steel, composite, acrylic temporaries, lithium disilicate, porcelain and zirconia—all in one bottle. It also successfully bonds to wet or dry normal or atypical enamel. The ability to reduce variables seen or unseen makes it a smart choice in any bonding situation. Available in a 6 ml squeeze bottle or single-dose caplets. Information: [relianceorthodontics.com](http://relianceorthodontics.com)

## ORTHODONTICS

### BRACKETS: SELF-LIGATING METAL

#### Ormco: Damon Q2

Built with a small profile and smooth, rounded corners for improved patient comfort and aesthetics, Q2 offers clinicians the rotation control needed to treat cases with precision and predictability. New vertical scribe line along with the rhomboid-shaped pad helps guide desired bracket placement, leading to versatility, efficiency and simplified mechanics.

### ELASTICS AND ELASTOMERICS

#### American Orthodontics

The Wildlife Series of elastics uses top-quality latex tubing. Proprietary technique results in precision cutting and guarantees consistent pulling forces. Nonlatex elastics are manufactured in a completely separate facility operated by certified personnel. AO's latex-clean facility also has its own air and ventilation system to prevent cross-contamination.

**FIXED CLASS II AND III DEVICES**

**Henry Schein Orthodontics:  
Carriere Motion 3D**

The Carriere Motion 3D Class II and Class III appliances are used to employ the sagittal-first philosophy to achieve an ideal Class I platform at the beginning of treatment (before placing brackets or aligners), when there are no competing forces operating and patient compliance is at its highest.

**IMPRESSION MATERIALS: ALGINATES**

**Kromopan USA:  
Kromopan/KromopanSil**

Kromopan makes taking impressions simple with the introduction of the color-changing indicator. It offers 168 hours of dimensional stability, so there's no rush to pour the impression. It is adaptable to different techniques and has diverse clinical case applications. With a high degree of elasticity and accuracy, Kromopan offers enough working time as well as the shortest time in the mouth for the comfort of patients.

**ORTHODONTIC HAND  
INSTRUMENTS**

**HuFriedyGroup**

Orthodontic instruments from HuFriedyGroup are forged from high-quality stainless steel, with an optimal blend of chromium and carbon. These elements ensure the creation of an instrument that resists corrosion given proper use and care. Each instrument is finished by hand to a satin luster; this nonglare surface keeps instruments looking beautiful.

### TEMPORARY ANCHORAGE DEVICE

#### Ormco: VectorTAS

The Vector Temporary Attachment System (VectorTAS) is a coordinated system of miniscrews, attachments and instruments designed to facilitate a wide range of orthodontic movements using simple mechanics without requiring external devices. After implantation, the screw may be attached to coil springs and crimpable posts, which provide the force vectors to move teeth. ### SURFACE DISINFECTANTS

#### Kerr: CaviCide1/CaviWipes1

CaviCide is for use on hard nonporous surfaces, designed for cleaning and decontamination of environmental and medical device surfaces. CaviWipes contain durable, nonwoven, nonabrasive disposable towelettes saturated with CaviCide surface disinfectant decontaminant cleaner. The sturdy towelettes will not bunch up during use and offer superior surface contact and better fluid capacity than other competitive wipes.
