RADIOLOGY

X-RAY EQUIPMENT: 3D IMAGING SOFTWARE

Dolphin Imaging and Management Solutions: Dolphin 3D

The Dolphin 3D software module is a powerful tool that makes processing 3D data simple, enabling dental specialists to diagnose, plan treatment, document and present cases. It features tools for onscreen manipulation and analysis of volumetric datasets: Images are easily oriented and rotated, and tissue density thresholds can be adjusted for detailed views of craniofacial anatomy. X-RAY EQUIPMENT: CONEBEAM CT SCANNER

DEXIS: i-Cat FLX V-Series

The i-Cat FLX V-Series offers three maximum fields of view—V8, V10 and V17—giving you the ability to scale the scan height to capture only the area of interest per the patient's immediate need. The system also provides low-dose imaging options, dedicated traditional 2D panoramic capabilities and more.

NEW PRODUCTS

Introduced between May 1, 2021–April 30, 2022

NEW PRODUCTS: EQUIPMENT

SprintRay: ProCure 2

The SprintRay ProCure 2 manipulates heat for efficient, controlled postcuring. Chamber scanning postcures all areas of the prosthetic. Instant heating targets 385 nm heat to specific parts and active heating keeps the interior of the device at an optimal temperature while the exterior remains cool to the touch.
