

ORTHODONTICS

DIGITAL INDIRECT BONDING

OrthoSelect: DIBS AI

The patented, award-winning DIBS AI software simplifies and automates the process of case setups, creates predictive outcomes based on any bracket prescription, and delivers accurate and affordable 3D-printed IDB trays for precision bracket placement. These advancements free up valuable chair time by shortening bonding appointments and reducing overall treatment time.

ARCH WIRES

American Orthodontics

American Orthodontics' wire portfolio offers several options to best fulfill treatment goals. Tanzo Premium Heat-Activated, Iconix Aesthetic Wire and NT3 Superelastic all provide excellent quality. Tanzo delivers consistent unloading forces that allow controlled tooth movement for predictable results. Available in mid- and low-force levels, Tanzo is resilient with excellent resistance to permanent deformation.

ORTHODONTICS

BONDING: TRADITIONAL PRIMER

Reliance Orthodontic Products: Assure Plus

Assure Plus allows clinicians to successfully bond to gold, amalgam, stainless steel, composite, acrylic temporaries, lithium disilicate, porcelain, and zirconia—all with one product. It also successfully bonds to wet or dry normal or atypical enamel. The ability to reduce variables seen or unseen makes it a smart choice in any bonding situation. Available in a 6 ml squeeze bottle or single-dose caplets.

BRACKETS: CERAMIC TWIN

Solventum: 3M Clarity Advanced Ceramic Brackets

Clarity Advanced Ceramic Brackets offer a small, low-profile design with exceptional strength and aesthetics. Their smooth, comfortable edges and reliable, predictable debonding make them a trusted choice for patients seeking discreet treatment without compromising performance.

Information: solventum.com

BRACKETS: METAL TWIN

American Orthodontics: Mini Master Series Brackets

Mini Master brackets are part of a versatile, metal twin system orthodontists around the world have trusted for more than 30 years. Combining diagonal torque and diagonal angulation, Mini Master brackets' patented design dramatically increases bonding precision, leading to fine results with fewer bracket repositions and wire bends.

DIRECT BOND MOLAR TUBES

American Orthodontics

iFit tubes from American Orthodontics are the ultimate combination of functionality, convenience, and patient comfort. Featuring a near-horizontal hook orientation, centered funnel entrance, enhanced bond strength and fit, and an ultra-low profile, the iFit family of tubes is the result of dedication to innovation.

Information: americanortho.com

ELASTICS AND ELASTOMERICS

American Orthodontics

The Wildlife Series elastics are crafted from premium latex tubing with optimal thickness for reliable performance. A proprietary cutting process ensures precise dimensions and consistent force delivery. For patients requiring non-latex options, American Orthodontics maintains a latex-clean environment equipped with an independent air and ventilation system to eliminate any risk of cross-contamination.

TEMPORARY ANCHORAGE DEVICE

Ormco Corporation: VectorTAS

The Vector Temporary Attachment System (VectorTAS) is a coordinated system of miniscrews, attachments, and instruments designed to facilitate a wide range of orthodontic movements using simple mechanics without requiring external devices. After implantation, the screw can be attached to coil springs and crimpable posts, which provide the force vectors to move teeth.
