## What features give your scanner an advantage over the competition?

Primescan provides all the tools necessary for faster orthodontic treatment, greater case acceptance and practice efficiencies. When combined with DS Core, Dentsply Sirona's cloud-based file storage and HIPAA-compliant file transfer platform, collaboration and case management are seamless. By storing all digital media in one place, DS Core enables users to develop a comprehensive view of their patient. By automatically uploading patient files such as intraoral scans and imaging data, practices experience efficiency at its best.

## What level of customer service or other services are included in the price of the scanner?

- In addition to the initial training provided by an authorized dealer, a CAD/CAM or IOS specialist from Dentsply Sirona visits the practice to train doctors and team members on using the Primescan.
- Through April 30, one Clinical Accelerator voucher is provided with each purchase of a Primescan AC or Primescan Connect. Vouchers are valid for any two-day, hands-on course at Dentsply Sirona's Academy.
- Lastly, customers can access videos and other content on the DS Academy website.

- Depending on the piece of equipment, Dentsply Sirona's warranty can be extended through Cerec Club or DS Core Care to provide peace of mind for years to come.

## Discuss specs, speed, support and ease of use.

The Primescan is fast: Clinicians can scan the full jaw (upper, lower, and buccal) in less than one minute. Primescan captures up to 1.5 million 3D data points per second, making it one of the most accurate scanners on the market. Switching from physical impressions to intraoral scanning enables direct communication with labs with improved accuracy. Primescan is compatible with all major lab software, allowing users to enhance their partnership with their preferred labs.

## What is the future of scanning in an orthodontic practice, and how is your company moving toward that future?

Dentsply Sirona is dedicated to improving patient care and making treatment more successful and predictable. The Primescan intraoral scanners are just one example of our tireless work toward increasing efficiencies and accuracy. In a 2021 survey of clinicians who've used Primescan and other digital intraoral scanners, 90% of respondents said they believe Primescan performs better.
