VivaScan™

What features give your scanner an advantage over the competition?

The intuitive, easy-to-use software allows practices to get up and running quickly. The Ivoclar Cloud offers a secure file transferring system that gives practices a direct connection with their laboratory. VivaScan also functions as an HD camera to allow for further case documentation.

What level of customer service or other services are included in the price of the scanner?

Training is just the beginning of the VivaScan adoption experience. The Ivoclar Customer Success Program is a commitment to turn your learning curve into a confidence curve. Buyers receive weekly follow-up calls during their first month of ownership and a dedicated customer success manager. We'll help users work through any challenges and create solutions across their practice.

Discuss specs, speed, support and ease of use.

- VivaScan is lightweight, weighing only 230 g, making for a comfortable user experience.
- Scanner tips are autoclavable up to 300 times each.
- The Ivoclar Cloud provides a HIPAA-compliant way to share files with laboratories.
- The two buttons on the wand allow for full navigation of the software, eliminating the need to move from mouth to mouse.

What is the future of scanning in an orthodontic practice, and how is your company moving toward that future?

The future of all of clinical dentistry is about convenience, efficiency and efficacy. In terms of comfort and time, patients prefer an intraoral scan over conventional impressions. As more practices integrate the technology, it will identify the current challenges and limitations, and VivaScan will continue to evolve based off the needs of the user to create a better workflow.
