What features give your scanner an advantage over the competition?

One of the smallest and most affordable scanners on the market, and sold with a Dell Performance laptop, the Virtuo Vivo is highly accurate and features above-average scan speed. An open software platform enables easy exporting of scans in multiple formats. Connect directly to multiple platforms including the ClearCorrect Doctor Portal, where the clear aligner workflow is a flexible, integrated and seamless experience for clinicians and patients.

What level of customer service or other services are included in the price of the scanner?

Providing first-class support from a single location, the Technical Support Team from Straumann Group Digital Solutions consists of highly skilled professionals with decades of combined dental experience in both lab and clinical settings. This team has been hand-picked to assist customers with any technical support or product-related questions.

Discuss specs, speed, support and ease of use.

- A guided workflow helps users at each step, allowing them access to services through integrated connectivity.
- Weighing 130 g (4.6 ounces), the small and light handpiece is ergonomically designed with a penlike grip.
- The wand is 207 mm long and has a removable, autoclavable sleeve, as well as a luminescent ring to indicate when scan data has been successfully captured.

What is the future of scanning in an orthodontic practice, and how is your company moving toward that future?

It is our belief that scanning is rapidly becoming the standard of care, along with fully digital workflows. Research shows that patients prefer practices that use more advanced technology, and we expect this trend to continue. Supporting comprehensive patient care, Straumann Group provides access to a complete ecosystem of integrated digital solutions that can increase efficiency and patient acceptance.
