

Company: Henry Schein Orthodontics
Product line: Reveal
Website: provider.revealclearaligners.com
Phone number: 800-344-3397

What specific physical characteristics set your aligners apart from others?

- Unique clarity: Reveal offers crystal clarity with little to no visible lines, so patients' natural teeth shine through.
- Precision fit: Reveal features precise-fitting aligners and optimized trim for exceptional control and fewer needed attachments.
- Stain resistance: After eight hours in coffee, Reveal kept its clarity over the leading brand. (Data on file.)

What features make your software and/or doctor dashboard unique and efficient?

- Studio Pro 4.0 treatment visualization software provides advanced tools for analysis and fine-tuning tooth movement.
- Notes, patient photos and details are stored in a single place for a comprehensive view of the case.
- The fully web-based platform means no software to maintain or update.

Are particular scanners required to submit cases? If so, which brands?

Reveal is compatible with most intraoral scanners, including 3Shape Trios, Planmeca, Primescan, Medit, Carestream and iTero.

Discuss turnaround time, customer service and other logistical advantages of your aligners.

- \$0 onboarding costs / provider fees.
- Free on-demand training and rep support.
- Lab technician-generated treatment plans.
- Compatibility with STL files from most intraoral scanners or PVS impressions.
- Reveal providers are able to leverage a rewards system and have access to industry-leading software such as Dentrix, Ortho2 and Sesame with Henry Schein One.

How does your company work with doctors who want to incorporate in-house 3D printing?

Not applicable.

Provide average doctor cost per full treatment case, and/or volume-based cost tiers.

The company offers savings on lab fees and up to 30% off with the Reveal volume discount program.
