

**Company:** Smile Stream Solutions

**Product line:** Stream Ligners

**Website:** streamligners.com

**Phone number:** 267-471-1016

### **What specific physical characteristics set your aligners apart from others?**

Stream Ligners uses GT-Flex Pro thermoforming plastic, a unique formulation of PETG and polyurethane polymers that has been tested as optimal in the key areas of clarity (93% light transmission), strength (10 times higher than other premier material impact results), flexibility (flex modulus < 180k psi), and comfort, all with an extremely low water absorption rate (0.14/24 hours).

### **What features make your software and/or doctor dashboard unique and efficient?**

Stream Ligners' portal software was developed to be both intuitive and easy to navigate. Features include self-registration capability; all treatment planning and patient records being accessible from one doctor-facing page; and the ability to establish master and subaccounts for larger group practices.

### **Are particular scanners required to submit cases? If so, which brands?**

Stream Ligners is an open platform and accepts scan data from any brand of scanner or device.

### **Discuss turnaround time, customer service and other logistical advantages of your aligners.**

Stream Ligners has a dedicated, human support team that is available to answer or troubleshoot user questions. The company also offers limited direct access to the clinical team. Average turnaround times are 48 hours for treatment plans and 10–14 business days for aligners.

### **How does your company work with doctors who want to incorporate in-house 3D printing?**

Stream Ligners offers treatment-planning-only and fabrication-only services for such doctors, and also sells its GT-Flex plastic for in-office printing. The company also offers private labeling, so product packaging has the doctor's brand on it.

### **Provide average doctor cost per full treatment case, and/or volume-based cost tiers.**

The company's Complete package, for a full treatment case, is \$949. Its Quick Package allows doctors to pay by individual tray at a cost of \$25 per aligner. Stream Ligners' \$500 Private Label Package option includes plate charges and practice-branded patient boxes for a full year.
