PowerBar—The Ultimate Class II Corrector

PowerBar is a fixed functional, direct-bond orthodontic appliance for correction of Class II cases into Class I through efficient segmental tooth movement. The universal design allows use on both sides of the maxillary arch.

Initial application can reduce total treatment time and allow easier segmental correction.

The patented base design ensures exceptional bond strength throughout treatment, while the socket vertical scribe line provides a visual guide for precise placement on the buccal groove of the molar. PowerBar is available in 23 sizes for canine-to-molar or first bicuspid-to-molar placement.

It features a champagne Iconix finish; the light gold color blends seamlessly with teeth, offering a discreet and visually appealing option for patients. It has become a favorite among orthodontic professionals and patients alike.

“Our goal is to enhance the patient experience by offering a product that not only performs exceptionally well but also looks great. The champagne finish of PowerBar is a perfect blend of functionality and aesthetics,” says Senior Product Manager Jon Wiegert.

PowerBar permits the use of almost all complementary appliances, but combined with

award-winning buccal tubes, buttons or UT hooks, thermoforming plastic, and elastics from American Orthodontics, it provides coordinated and effective treatment.

After bonding attachments to the lower arch first or second molars, the correct-size universal PowerBar is placed in the upper arch. Once Class II is corrected, the PowerBar can be removed and space closed with traditional braces.

HIGHLIGHTS

- **Universal fit and uniform radius:** No right or left designation—sizes are interchangeable in both upper arch quadrants and manufactured to maintain radius uniformity for consistent fit throughout sizes.
- **Durable and effective Class II correction:** High-quality materials ensure long-lasting performance and proven results in correcting Class II malocclusions.
- **Ease of use and aesthetic appeal:** Simple installation and adjustment for orthodontic professionals, and champagne finish blends beautifully with natural teeth.
